### **EXAMINER'S AMENDMENT**

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on September 08 2004, James J. Murphy requested an extension of time for 1 (ONE) MONTH(S) and authorized the Director to charge Deposit Account No. 20-0821 the required fee of \$110 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Re claims 1-2, the word "can" in line 7 is removed because it is a relative term which renders the claims indefinite.

Claims 7-8 in the present applicant are cancelled by the applicant's representative, James J. Murphy, on September 08 2004.

2. Claims 1-2 and 4-6 are allowed.

3. Claims 3 and 7-8 are cancelled.

4. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render the obviousness an integrated circuit comprising a FIR filter; an output mechanism which selectively providing either

only fully settled data or all data wherein the all data including the unsettled data; and a register which allows a user to set to control the data output selection as cited in independent claim 1; and an external pin which allows a user to set to control the data output selection as cited in independent claim 2.

The closest prior art found are Cabler et al. (U.S. 5,656,621) and Matlab ("Signal Processing Toolbox for Use with Matlab: Chapter 5 Interactive Tools"). Cabler et al. disclose an FIR filter. Matlab discloses in graphic an output mechanism selectively providing either a partial/fully settle data by editing the time axis. However in combination of Cabler et al. in view of Matlab, they fails to disclose an integrated circuit comprising an output mechanism having a register or an external pin which allow a user to control the filtered data output either only fully settled data or all data which includes the unsettled data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chat C. Do whose telephone number is (703) 305-5655. The examiner can normally be reached on M => F from 7:00 AM to 4:30 PM.
